

Garden State Parkway Widening and Interchange Improvements; MP 63-80

Ocean County, NJ

The Garden State Parkway widening consists of three construction contracts. The plans will make it safer for motorists, adding a third lane and shoulders, as well as interchange improvements.

As a member of the Construction Management Team, Naik Consulting Group, P.C. (**NAIK**) provided the Office Administration and Office Engineering using CapEx; performed inspection services for grading, drainage, paving, structures, and sign structures under extensive MPT; and performed the Survey Services for the construction management team for all three (3) construction contracts.

The Project Involved:

- New Structures;
- Structure Widening;
- Structure Demolitions;
- Environmental Compliance;
- Utility Relocations;
- Extensive MPT and Stage Construction;
- Interchange Improvements at the Ramps and Access Points.

Agency/Owner:
NJTA/Garden State Parkway
