

New Jersey Turnpike Authority Basilone Memorial Bridge Rehabilitation

Edison Township and New Brunswick, NJ

This \$5.5M bridge rehabilitation project involved blast cleaning and painting of structural steel and zone painting of weathering steel, replacement of open grid deck systems, repairs to deteriorated/damaged trusses and sidewalks, and repaving roads on either side of the bridge approaches.

Naik Consulting Group, P.C. (**NAIK**) performed painting inspection tasks, including inspection of abrasive blasting, lead abatement, application of intumescent fireproofing, and repainting of the bridge, and preparation of the inspector reports in accordance with the CapEx System.

NAIK also monitored the negative pressure enclosure with a suspended work platform to contain blast abrasives, dust and debris. **NAIK** closed-out the project after inspection was completed.

Agency/Owner:
New Jersey Turnpike Authority

Construction Cost:
\$5.5M

Project Duration:
2010
